pubget inc

PubgetCloud

Pubget's cloud services allow you to tap into our 25 million article metadata and PDF database from any app, site or mobile device. You can access it in three ways to enhance, build, and promote your site.

Content stream

- Enrich your destination with *fresh content, updated daily*. Stream the latest publications from the Pubget Cloud with one simple API call.

- Is your site a search portal? Federate your search through Pubget and deliver relevant results from Pubget's 25 Million article database.

Embeddable PDFs

- Bring Open Access articles directly to your users with zero hassle and minimal setup.

- Correlate your brand with the **high impact publications** that promote it.

Article Resolver

- Let Pubget be your Article Resolver, **a direct link** to the literature your users are searching for. It's fast, easy, and free!

- Dynamically link all of your citations to Pubget.com and accelerate your users workflow as they navigate the web of literature.

Let's get started!
